

Pacific Product Data Sheet

PACIFIC EXTREME PRESSURE GREASE- EP1 & EP 2

Introduction : Pacific EP1 & EP2 Greases are prepared from Lithium based mineral oils blended with additives for extreme pressure, anti-corrosion and oxidation inhibitors. These have properties to provide good film strength under extreme Pressure. These have also ability to protect rust & water wash out.

Application :

1. General purpose bearing lubrication for all types of bearings.
2. Equipment where moist or wet conditions are common.
3. Heavy duty Ball and Roller bearings working under Extreme Pressure and shock loads in Heavy Engineering Industries.

Performance Benefits :

1. Prolonged drain intervals.
2. Protection from corrosion & rust.
3. Resistance to water washout.
4. Capacity to bear Extreme Pressure & Shocks Loads.
5. High drop point.

Specifications : IS 7623-1993, NLGI- 1 & 2

Characteristic

	EP1	EP2
1. Appearance	Brown	Brown
2. Base oil Viscosity @40oC	120	120
3. Base Oil Type	Mineral	Mineral
4. Soap Type	Lithium	Lithium
5. Viscosity Index of base oil, min.	90	90
6. Cone Penetration, @25oC+0.5oC	310-340	265-295
7. Drop Point, oC min.	180	180

Pack Size : 180 Kg, 18 Kg
